The Health and Safety Plan from the CERCLA Remedial Investigation/Feasibility Study Work Plans for the 100-BC-1 and 100-BC-5 Operable Units.

Description

Approval of the Health and Safety Plan (HASP) will permit generation of Pre-Job Safety Plans and Radiation Work Permits for characterization work to begin in the 100-BC-1 and 100-BC-5 Operable Units.

The HASP details the real and potential health and safety risks associated with characterization activities that will occur in these operable units as part of the Phase 1 Remedial Investigation. It also provides site background information methods for mitigating all anticipated risks, and emergency response site management details.
